PROJECTS

MEDAI | AI-Based Medical Report Classification and Health Assistant *Python, FastAPI, React, scikit-learn*

- Built a full-stack educational app (React/Vite, FastAPI) that processes PDF and image reports using pypdf and Tesseract OCR, extracts six lab markers, and shows rule-based screening and health explanations; output is informational, not a diagnosis.
- Trained a TF-IDF and Logistic Regression document classifier, compared with Linear SVC on a synthetic dataset; wrote 68 backend and 9 frontend tests.

InterviewAI | AI-Powered Personalized Mock Interview Platform *Python, Streamlit, Gemini API*

- Built a Streamlit app that parses a PDF resume and uses the Google Gemini API to generate 10 personalized interview questions.
- Implemented AI answer scoring with feedback and a final performance report, with JSON response validation and retry logic.

EXPERIENCE

Machine Learning Intern, CodSoft (Virtual) *July 2026*

- Completed and submitted machine learning projects including Credit Card Fraud Detection and Movie Genre Classification using Python and scikit-learn.
